

Creating links to Blackboard Portfolios in a learning site

There are two tools in the Blackboard Learning Sites for accessing the Portfolios.

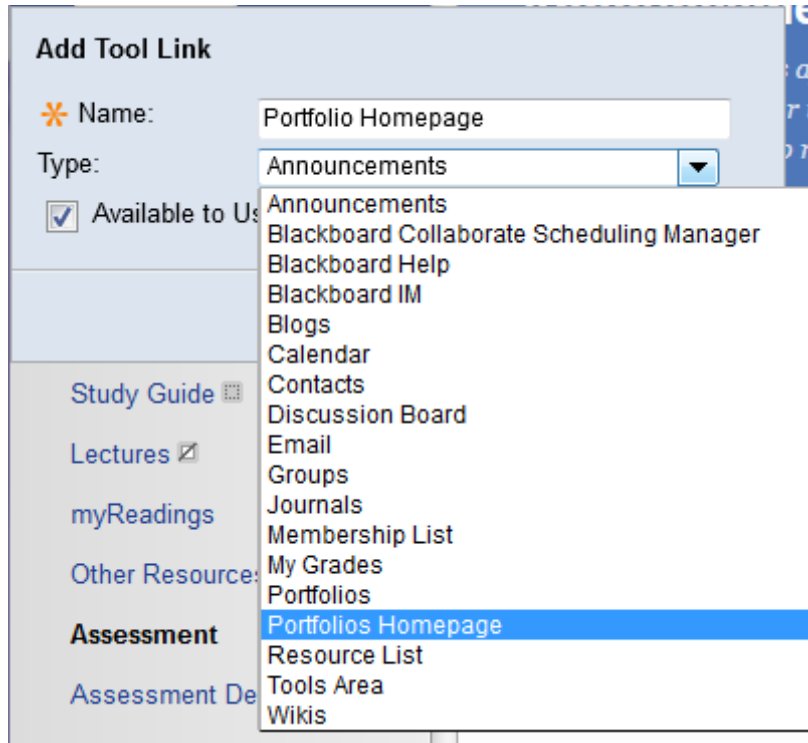

To create a Tool link on the navigation bar to the Portfolio tools, click on the “plus” button and select “Tool Link”.

Link to **Portfolios that have been shared** with the Learning site:

Link to the **Portfolio's Homepage**. This link will take users to their own Portfolios.

Links will be created at the bottom of the navigation bar. You can drag and drop the links to another position on the navigation bar by hovering beside the button and using the up/down arrow.
